

PIENAAR ENERGY (PTY) LTD

5MWh Photovoltaic Container for Mining in Saint Lucia

Overview

Backed by St Lucia Electricity Services (LUCELEC), the initiative will be developed on a 70-acre site on the island's southwest coast. Once complete, the system will connect to LUCELEC's 66 kV transmission grid, reinforcing local grid stability while increasing renewable energy. In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project—a 10 MW photovoltaic installation paired with a 26 MWh lithium-ion battery energy storage system (BESS). The project, set to be tendered later this year. Since 2022, Bairen Energy Storage has deployed 47 battery energy storage systems (BESS) across West Africa. Their Ouagadougou flagship project—a 20MW/80MWh lithium-ion facility—powers 15,000 homes after dark using solar energy captured during daylight. The Rocky Mountain Institute provided technical assistance for which will provide clean demand increasing by over 200% in the past two years.
