

**PIENAAR ENERGY (PTY) LTD**

# **5mv wind turbine generator price**

## Overview

---

Modern best-in-class 1-3+ megawatt onshore wind turbines generally cost approximately \$1.2 million per megawatt in upfront equipment capital and manufacturing expenses. There are several types of 5mW wind turbines, all suitable for medium and high wind speed zones and capable of generating large amounts of power. They differ with features such as rotor design, with some having larger rotor diameters than others, and drive systems, which can be direct or geared. Dramatic Cost Range: Wind turbine costs span from \$700 for small residential units to over \$20 million for offshore turbines, with total project costs varying from \$10,000 to \$4,000+ per kW installed depending on scale and location. The generator adopts high quality rare earth permanent magnet material as rotor, and the stator adopts pure copper enameled wire, which is made of real material. Or a combined output of 5MW at 100F / 38C. Unit is available as a "Turn Key" Generator package.
