

**PIENAAR ENERGY (PTY) LTD**

# **A set of solar wind turbines**

## Overview

---

The wind solar hybrid system's main components include a wind turbine and tower, solar photovoltaic panels, batteries, wires, a charge controller, and an inverter. After all, the sun can't always shine and the wind can't always blow. This combination of solar and wind power uses two sources that are not always on, and. The most significant thing you can do to improve the effectiveness of your renewable energy system is to install a wind turbine and solar panel combination system. Setting up a wind turbine and solar panel system together is quite similar to setting up either system alone, with one key exception:. The wind-solar hybrid system generates electricity from wind energy and solar energy.
