

## **PIENAAR ENERGY (PTY) LTD**

# **Add 20 000 lead-acid batteries for solar base stations**

## Overview

---

In this article, we'll explain why grid-tied systems shut off, what options exist for adding battery backup, the pros and cons of each approach, and how to choose the right solution. Grid-tied solar systems are designed to operate in harmony with the utility grid. Understanding Battery Types: Familiarize yourself with various battery options such as lead-acid, lithium-ion, saltwater, and flow batteries to choose the best one for your solar system. Energy Independence: Integrating batteries allows you to store solar energy, providing power during non-sunny. Solar batteries work by saving extra electricity so you can use it later when you need it. Think of them like water tanks that store water for later use—only these store energy. When you turn on lights or appliances, the battery gives out power.
