

PIENAAR ENERGY (PTY) LTD

Antigua and barbuda energy conservation

Overview

Antigua and Barbuda aims to radically change the way it sources, distributes and uses energy with: Energy Cost Reduction through targeted efficiency and conservation measures designed to reduce the overall energy intensity of the economy by 10% below a 2010 baseline within 10 years. The burning of fossil fuels — like coal, oil and natural gas — releases gases into the air, mainly carbon dioxide, sulfur dioxide, methane and nitrous oxide. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. Antigua is aware that our dependence on energy affects all sectors within our society and has made the commitment to meet the energy needs of the. Antigua and Barbuda has entered one of the most ambitious clean-energy transitions in the Eastern Caribbean, positioning itself as a regional model for resilience and modern infrastructure.
