

PIENAAR ENERGY (PTY) LTD

Are photovoltaic panels of level one or level two

Overview

While Tier 1 is an official industry-sanctioned label, there is no criteria for “Tier 2”. Any solar manufacturer that does not meet Tier 1 criteria falls into the Tier 2 category. 'Tier 1 solar panels' are solar panels made by large, reliable solar panel manufacturers. It's not a system to judge the quality of solar panels - it's actually a measure of 'bankability,' and is based solely on financial criteria. Deciding between Tier 1 vs. Tier 2 solar panels is one of the first decisions you'll be faced with, and it can be the difference between easily meeting your long-term electric needs or leaving the door open to obstacles with long-term maintenance and overall system reliability. But what do these classifications actually mean—and why should they matter to you?

Understanding the difference between panel tiers helps ensure you invest in a solar system that's. The term “Tier 1” is often used to describe top-quality solar panels, but what does it actually mean?

Understanding this classification is essential to ensure you get a system that delivers on its promises of longevity and performance.

Are photovoltaic panels of level one or level two

What is a "Tier 1" solar panel? Tier 2 or 3?

'Tier rankings' are systems through which organisations - usually financial analysis & investment firms - classify the 'bankability' of particular solar panel products.
