

**PIENAAR ENERGY (PTY) LTD**

# **Armenia new energy storage project**

## Overview

---

The Ayg-1 solar plant near Aragats mountain recently added 20MW/80MWh storage—enough to power 8,000 homes during peak hours. Here's the kicker: it reduced grid instability events by 62% in its first quarter. Farmers now joke they'll name their next cow "Megapack".

YEREVAN, Armenia — On March 5, an in-depth discussion on “Battery Storage Solutions Development in Armenia” took place at the American University of Armenia (AUA). The event was co-hosted by STREACS (Strengthening Research in Armenia for Energy Transition toward Climate Solutions), an EU-funded. As Armenia works towards the Government's ambitious renewable energy targets and the share of variable renewable generation increases, the country might need to install battery storage systems to ensure the reliable and smooth operation of its power system.

While the need for battery storage is. A 25-35 MW-4h BESS offers a cost-effective solution to enhance system resilience. Armenia imports 81% of its primary energy supply and 100% of its fossil and nuclear fuels. These imports stem mainly from Russia and to a lesser extent also from Iran. Expansion in cross-border transmission capacity is.

Summary: Armenia's groundbreaking 8GWh energy storage project is set to revolutionize its power grid, enhance renewable energy integration, and stabilize electricity supply. Why Arme. ected to commence operations by mid-2027. The global energy storage market, worth \$33 billion [1], offers solutions this Caucasus nation is now embracing.
