

PIENAAR ENERGY (PTY) LTD

Battery safety norway

Overview

This report provides an overview of the Norwegian battery industry, including government policy and relevant documents. Battery Norway will closely follow the EU's battery strategy and advising the authorities. These guidelines are tailored for smaller vessels and provide technical and operational guidance to ensure that battery system installations comply with section 9 of the Ship Safety and Security Act. The guidelines in RSV 09- 2022 serve as an alternative to the rules of a recognised organisation. Norway is uniquely positioned to succeed with the green transition, thanks to its rich natural resources, top class industrial expertise, and the Norwegian working life model, combined with more than 100 years' experience in renewable power, electrification, world-leading offshore technology and. r sectors, are causing a soaring demand for batteries. The global dominance of the Asian stakeholders within Li-ion battery (LIB) cell production, has left the European market extremely vulnerable. Seeking to mitigate this situation, we now see a large number of battery cell manufacturing. rethink their approaches and sourcing strategies. The battery industry will undoubtedly play an important role in limiting the effects of climate change and strengthening the energy security in Norway and Europe.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
