

PIENAAR ENERGY (PTY) LTD

Battle of energy storage system integrators

Overview

The world's five largest BESS integrators have been revealed - now the battle for market share will intensify, with supply chain challenges, perceptions of fire risk, and records on safety all set to influence future success. That's what developing energy storage systems feels like without skilled energy storage system integrators. Therefore, price has become a key factor for companies to obtain orders. Energy Information Administration projecting a record 18.3 GW installed in 2024—developers face unprecedented growth alongside supply chain uncertainties, evolving battery chemistries, and changing grid. As renewable energy adoption accelerates, energy storage becomes critical for grid stability and energy independence. Battery, battery energy storage system (BESS), energy storage systems, fuel cell, generation expansion planning, hybrid energy storage, micro 0GWh, a year-on-year increase of over 200%.
