

**PIENAAR ENERGY (PTY) LTD**

# **Bess solution for energy storage power station financing**

**51.2V 300AH**

## Overview

---

Battery energy storage systems (BESS) are accepted as one of the key solutions to address these challenges. BESS can respond to real-time renewable energy fluctuation challenges through its fast response capability (congestion relief, frequency regulation, wholesale arbitrage, etc. Global energy storage capacity additions exceeded 15 GW in 2024, with lithium-ion battery costs declining 90% over the past decade to. In this article we consider the role and application of battery energy storage systems (BESSs) in supporting renewable energy power generation and transmission systems and some of the challenges posed in seeking to project finance BESS assets. While equity investors bring cash and risk appetite, debt typically funds 50-75% of project costs. Large scale deployment of this technology is hampered by perceived financial risks and lack of secured financial models. | Image: pv magazine / Marian Willuhn.
