

## PIENAAR ENERGY (PTY) LTD

# Bess system for solar factory in indonesia

## Overview

---

Key steps identified for successful BESS integration include a clear roadmap, a suitable business model, energy modeling, standards development, and capacity building. This project aims to establish a strong foundation for BESS deployment in Indonesia through model-based. Unifers has deployed its cutting-edge Power Plant Controller and SCADA systems to optimize a pioneering solar-plus-BESS project in Indonesia. This initiative marks a critical step in Indonesia's transition to renewable energy, combining 50 MW of solar PV with a 14 MWh battery energy storage system. Amid rising demand for clean energy and the need for a reliable national electricity supply, SUN Energy offers various solar energy systems tailored to customer needs, from grid-connected (on-grid) systems to independent (off-grid) systems integrated with Battery Energy Storage Systems (BESS). The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. The. This initiative seeks to accelerate the development of BESS projects as well as open commercial and public financing for the long-term development of these energy storage systems. PLN, the state-owned electricity company, has a wind power project with an Indonesian private large energy. Nusantara Sembcorp Solar Energi (above) is Sembcorp's first venture into Indonesia's large-scale solar PV market.
