

**PIENAAR ENERGY (PTY) LTD**

# **Bolivia Solar Electricity System**

## Overview

---

This project is a joint effort between the Bolivian government and the Inter-American Development Bank (IDB). The Board of Directors of CAF, Development Bank of Latin America and the Caribbean, approved. Bolivia is making significant strides in rural electrification with a \$325 million investment in renewable energy. Announced by the government, this ambitious project will install solar panels in rural areas, aiming to provide electricity for 20,000 families across 110 communities in 35. Verónica is a young woman from Santiago de Callapa, a small village near La Paz, where 7,000 people live in the arid and cold landscape of the high planes, at an altitude of 3,800 meters above sea level. She is Secretary of the nation-wide organization, Bartolina Sisa Women Confederation, and part. The Altiplano plateau in western Bolivia has some of the world's highest and most consistent levels of solar radiation, creating high potential for solar photovoltaic power in the region, but structural challenges may prevent scaling. Its use reduces dependence on fossil fuels, lowers the carbon footprint, and contributes to energy autonomy for businesses and households.

### ENERGY STORAGE SYSTEM

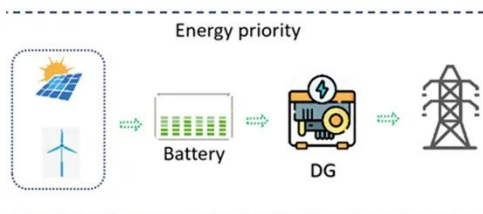

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

### Bolivia's Photovoltaic Energy Storage Revolution: Powering the Future

Did you know Bolivia's Altiplano region receives 6.5 kWh/m<sup>2</sup> of daily solar radiation - among the highest globally? Yet paradoxically, 32% of rural communities still lack reliable electricity access.

## Solar Power Potential in Bolivia

The high-altitude regions provide ideal conditions for efficient solar power generation, while off-grid solar solutions are crucial for rural and remote areas still lacking electricity access.
