Fire Protection for Lithium-ion Battery Energy Storage Systems

Aspirated smoke and off-gas detection systems
Lithium-ion battery cabinet protection
Siemens aspirated smoke and Off-Gas Particle detection
How does ASD "Off-Gas Particle" (OGP) detection work?
Venturi bypass flow
Insect filter Chamber flow
Dust
Intelligent Classification of Airborne

Particles Advantages of using blue and infrared light scattering Easy Installation and Integration Low Maintenance and Long Product Lifecycle Features and Benefits Applications As its name implies - "aspirated" smoke and off-gas detection systems use an "aspirator" mounted in a detector unit. The detector connects to a sample pipe network mounted within the area or object being protected. Using the suction from the aspirator, air is continuously sampled and transported to the detection chamber for analysis for particles See more on assets.new.siemens
