

**PIENAAR ENERGY (PTY) LTD**

# **Brussels smart solar power system**

## Overview

---

Beginning in May 2025, Belgium will allow plug-in solar panels and batteries to connect to the grid, marking a major shift in energy use. This new rule will enable more households to easily integrate solar energy through mobile, plug-and-play devices. This guide explores installation trends, government incentives, and real-world success stories – plus practical tips for homes and businesses considering renewable energy solutions in Belgium's capital. So far, the company has installed 553,500 smart meters in Flemish homes with PV systems. They can be installed quickly, and as a result offer immediate savings, making solar panels both a profitable and sustainable. Lummen (Brussels Morning Newspaper) – Lummen installed 298 solar panels on BKO, Chiro Leouki, and De Zonnebloem school. As VRT News reported, Lummen is working to cut down on CO2 and use more green energy.
