

PIENAAR ENERGY (PTY) LTD

Cairo wind and solar energy storage project

Overview

Cairo is redrawing the map of its energy future with a USD 1.36 billion handshake sealed with Norwegian developer Scatec to build a 1 gigawatt (GW) solar plant and a wind energy project, beginning an ambitious push toward shedding its reliance on natural gas. The promise of a major economic impact from hydrogen production, specifically green hydrogen using renewable energy, also prompted calls for more investment in renewable energy in a country with significant solar and wind resources. 6 GW storage projects in Cairo. [Link copied!](#)[Copy failed!](#) CEECOIC relocated its North and West Africa headquarters to Cairo and planned large solar and storage projects in Egypt. AMEA Power, one of the fastest-growing renewable energy companies, signs Power Purchase Agreements (PPAs) to develop largest solar PV in Africa and first utility-scale battery energy storage system in Egypt. With a deadline approaching in Q4 2024, this project aims to deploy 500 MW of grid-scale battery storage, complementing the nation's \$40 billion renewable energy expansion. But here's the kicker—Egypt's 2030 Vision aims for 42% renewable energy by 2030. In 2022, the Zafarana Wind Farm—a 545 MW beast—faced a “bad hair day” when wind speeds dropped 30% during peak.

Cairo wind and solar energy storage project

Egypt & CEECOIC planned PV& BESS projects with localization

CEECOIC has relocated its North and West Africa headquarters to Cairo and outlined plans to establish a 1 GW solar power plant, a 600 MW battery storage facility, and a separate 1,000 ...
