Can cylindrical lithium batteries be placed sideways

Overview

Yes, for the most part, modern sealed lithium-ion batteries can be mounted in any position – vertically, horizontally, or on their side. You will need to know how the cells are oriented in the battery. How would one know?

Here is Wills video, at 5:56 the battery is disassembled, does that help?

I was able to find some posts from. Yes, because there is no fluid inside of LiFePO4 batteries. Do. I am buying a Lithium-Iron-Phosphate (LiFePo4) battery.

Can cylindrical lithium batteries be placed sideways

Installing Renogy Lifepo battery vertically

Battleborn does know what they are talking about but they use cylindrical cells so what they say does not apply to batteries with prismatic cells. If you must orient the batteries sideways ...

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 1500W Peak Output Power
- 2 MPPT Trackers, 100% DC Input Overvoltage
- Max. PV Input Current 16A, Compatible with High Power Modules

 Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart IV Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

During assembly, does placing the battery cells vertically or sideways

Placing cells sideways, or horizontally, involves orienting them so that their cylindrical axis or prismatic face is parallel to the ground.
