

**PIENAAR ENERGY (PTY) LTD**

# **Can people stand on double-glass photovoltaic panels**

## Overview

---

Walking on solar panels can cause damage to the delicate photovoltaic cells and compromise the overall performance of the panel. The glass cover of the panel is not designed to support the weight of a person, and any excessive pressure can lead to cracks or. The simple answer is no. This glass can withstand several pounds of snow, impacts from dust particles or hail, and even withstand fast winds from hurricanes. While photovoltaic (PV) modules possess a degree of structural integrity necessary for outdoor survival, they are designed to handle widely. Can You Walk on Solar Panels Without Breaking Them?

Solar panels are vital for sustainable energy, but like any technology, they need proper care to ensure longevity. One common question is whether it's safe to walk on them. In this guide, we'll explore the risks, benefits, and factors to consider. Solar panels have a lifespan of more than 20 years and are made with enough strength to withstand natural calamities such as hail, wind, heavy rain, and snow, as well as dust and debris and small branches, given they are well maintained.

## Can people stand on double-glass photovoltaic panels

---

### Can You Walk on Solar Panels Without Breaking Them?

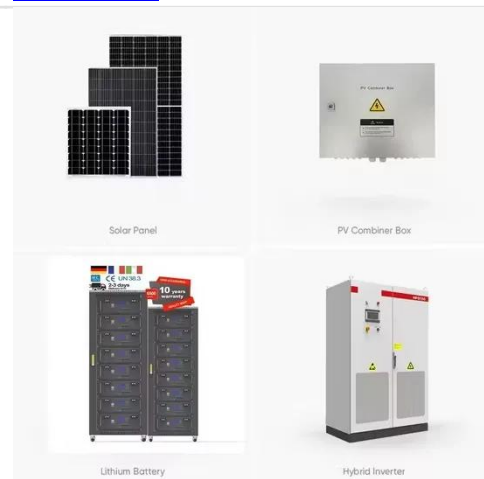

It's not recommended to walk on solar panels. They are fragile and can crack or get damaged, reducing their efficiency. Always take precautions when handling or cleaning them. ...

## Can You Walk on Solar Panels? Safety and Risks Explained

Although they're made of tempered glass and crystalline cells, it's best to

avoid stepping on them. Walking on them can cause scratches, cracks, or even break the panel.

## Can You Stand on Solar Panels? The Risks Explained

The most common consequence of stepping on a solar panel is the formation of micro-cracks within the silicon cells, which are nearly invisible to the naked eye.
