

## PIENAAR ENERGY (PTY) LTD

# Can photovoltaic panels from small factories be used

## Overview

---

A study published this past May concluded that up to 35% of the energy used for manufacturing in the U. could be provided by solar panels on the factory buildings themselves, dramatically reducing the industry's environmental impact. Panels come in types based on cells. Cells capture sun and make power. Common for factories: 72-cell or 144-cell half-cut. Good for mid-size. Solar power technology converts sunlight into electricity using photovoltaic (PV) panels made from semiconductor materials like silicon. An inverter then changes DC into alternating current (AC), which runs machinery and lighting. Photovoltaic systems are at the heart of solar energy utilization in factories.

## Can photovoltaic panels from small factories be used

---

### Solar for Industrial Processes

Solar energy can be used to generate heat for a wide variety of industrial applications, including water desalination, enhanced oil recovery, food processing, chemical production, and mineral processing, ...

### ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## New study: Solar panels can power some factories entirely

A study published this past May concluded that up to 35% of the energy used for manufacturing in the U.S. could be provided by solar panels on the factory buildings themselves, ...
