

**PIENAAR ENERGY (PTY) LTD**

**Can the locker be put into the door**

## Overview

---

Avoid placing the locker directly in front of the door or window as it will increase the outflow of wealth. Lockers on each end should be secured and screws should be placed approximately each 32" apart supporting surfaces. \*Depending on location and layout, longer securing drywall screws. At least two screws should be used. This guide will help designers, architects, and contractors select the appropriate locker types for their particular setups while ensuring that the correct number of units are compliant with the ADA. Also included are guidelines for maximum and minimum reach heights for users. All lockers have pre-drilled holes for these connecting bolts. Lastly, measure the depth of the space. Consider any protruding objects or structures that may limit the locker's depth.

## Can the locker be put into the door

---

### Locker Installation Guide

Using the stud markings you previously marked pre-drill a hole in the back of the locker and attach locker to the stud with a wood screw, minimum of 2" in length.
