# Can the outdoor power supply of the base station be used

## Overview

---

Yes, with a proper 12V DC power supply (3-5 amps minimum) and base antenna system. However, dedicated base stations typically offer better features, ergonomics, and performance for home use. Typical range is 15-25 miles for local communications. ut, Multiple-Output (MIMO) technology, and Small Cell. (1) Millimeter-wave technology has three major characteristics, facilitating the realization of the IoT and smart cities. (2) Low latency means the response time of information transmission is very short, and message responses are real-time. Bring safe, permanent power outside with outdoor ground boxes and charging stations. It requires a license in United States but can be used license-free in Canada. ----- The outdoor power supply is an outdoor multifunctional power supply with a built-in lithium-ion battery and its own electric energy storage, also known as a portable AC or DC power supply. Whether you're monitoring local traffic, participating in emergency communications, or simply enjoying conversations with fellow CB. The General Mobile Radio Service (GMRS) is a North American land-mobile FM UHF radio service designed for short-distance two-way communication. ----- "Information is power. But like all power, there are those who want to.

## Can the outdoor power supply of the base station be used
