Can you raise sheep with solar power in Inner Mongolia

Overview

Can you imagine sheep sheds constructed with solar panels?

Herders in Gaole Gacha Village, north China's Inner Mongolia Autonomous Region, have made them. In 2021, Gacha Joint Stock Economic Cooperative and 22 herders established a professional agricultural cooperative. They installed photovoltaic. HOHHOT, July 9 (Xinhua) -- Under a blue sea of solar panels, sheep roam and graze on fresh grass in north China's dry pastures. I'm a herdsman with a job -- I'm a maintenance worker at the solar power station," said Hasenmongkh, 30, pointing to his flock of nearly 100 sheep. The. In a groundbreaking study that combines renewable energy with traditional farming practices, researchers have observed remarkable changes in 1,700 sheep grazing amidst solar panels. Let's explore how sheep and solar. The American Solar Grazing Association estimates that about 80,000 sheep currently graze on more than 40,000 hectares of 500 solar panel sites in 27 states in the United States, a figure that has increased tenfold in just two years. While the United States announces this new era in agriculture.
