

PIENAAR ENERGY (PTY) LTD

Canopy type solar photovoltaic panel installation

Overview

Anywhere you would like shade is an opportunity to install a solar array in the form of a canopy or awning. If you are a DIYer, there are prefab kits available in both metal and wood. A solar canopy can be understood as a structure that supports solar panels above an open space. It can be a walking area, parking space, or any outdoor spot. While canopies serve practical purposes, such as shelter, they can also enhance the aesthetic appeal of a building or highlight specific pathways. These structures are usually covered. Solar canopies are systems that use either wood, metal, or another material to hold up solar panels on a non-roof structure.
