

**PIENAAR ENERGY (PTY) LTD**

# **Chile air-cooled solar container energy storage system**

## Overview

---

A 200MW air-cooled installation now provides emergency response within 0.3 seconds – faster than you can snap your fingers. The system's secret sauce?

Hybrid architecture combining: With 14 years specializing in grid-scale energy storage, we deliver turnkey solutions. Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the reliability of the country's electric grid as it pursues new renewable energy generation. Chile has the potential to run. Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. Owned by ENGIE Chile, the plant is located in María Elena, in the Antofagasta Region. It has a storage capacity of 638 MWh, with 139 MW of. erano Energy has secured environmental approval to develop and operate the Catalina del Verano solar-plus-storage project in Rancagua, in Chile's O'Higgins region, located some 100 kilometers south of Santiago. The facility will combine 41 MW of solar PV with a 360 MWh battery energy storage system. The nation is not merely adapting to global trends but is actively constructing one of the world's most advanced and regulated frameworks for battery energy storage systems (BESS). Driven by the dual engines of ambitious decarbonization mandates and the existential needs of its world-leading mining.
