

**PIENAAR ENERGY (PTY) LTD**

# **Combining distributed solar with energy storage**

## Overview

---

Hybrid energy solutions are emerging as the answer, combining renewable sources like solar and wind with traditional power generation and energy storage. This combination delivers energy security while decarbonizing the grid. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. The reason: Solar energy is not always produced at the time. NREL is analyzing the rapidly increasing role of energy storage in the electrical grid through 2050. Grid operational modeling of high-levels of storage.
