

PIENAAR ENERGY (PTY) LTD

Commercial and Industrial Solar Power Plants

Overview

While the basic solar technology is similar to that used in residential panels, Commercial and Industrial solar systems are much larger in scale, more complex in design, and customized to meet the high energy demands of factories, warehouses, hospitals, schools, data centers. While the basic solar technology is similar to that used in residential panels, Commercial and Industrial solar systems are much larger in scale, more complex in design, and customized to meet the high energy demands of factories, warehouses, hospitals, schools, data centers. Commercial and industrial solar panels are photovoltaic (PV) systems designed specifically for non-residential use. These solutions produce renewable power at large scales which helps industries decrease their fossil fuel usage while. It harnesses sunlight through photovoltaic (PV) panels, which convert solar energy into direct current (DC) electricity. This DC electricity is then converted into alternating current (AC) through inverters, making it usable for commercial applications. Amidst this, the one thing that bothers many industrial owners is the costly power bills. Before you call a solar company to set up your system, you should learn about these differences.

Commercial and Industrial Solar Power Plants

Solar for Industrial Processes

Solar energy can be used to generate heat for a wide variety of industrial applications, including water desalination, enhanced oil recovery, food processing, chemical production, and mineral processing, ...

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional) when an arc fault is detected the inverter immediately stops operation
