

**PIENAAR ENERGY (PTY) LTD**

**Contains high-energy lithium  
battery and solar energy on-site  
energy**

**51.2V  
200Ah/300Ah  
LiFePO4 battery**

## Overview

---

Lithium batteries and solar panels are compatible because their high energy retention complements solar's intermittent energy generation, ensuring consistent power supply. Why lithium?

There are many ways to store energy: pumped. With 20 kWh of battery capacity, the Lunar System provides more energy for longer outage protection. It's the new standard to handle your home's growing energy needs. If your home is in the path of a storm, the Weather Watch feature. Compared to conventional lead-acid batteries, lithium-ion batteries offer several critical advantages: Unmatched Energy Density: With an energy density of 150–250 Wh/kg— up to five times higher than lead-acid batteries (30–50 Wh/kg)—lithium-ion batteries provide significant space savings, making. Battery energy storage plays an essential role in today's energy mix. As well as commercial and industrial applications, battery energy storage enables electric grids to become more flexible and resilient.

Contains high-energy lithium battery and solar energy on-site energy storage system
