

PIENAAR ENERGY (PTY) LTD

Corrosion-resistant alternative solutions for folding containers product specifications

Overview

Corrosion-resistant steel: Use of weathering steel with excellent natural resistance against oxidation and corrosion. Specialising in corrosion prevention, we manufacture a range of Aluminium Barrier Foil, 2D and 3D Bags and Liners, to suit any application where deterioration of the packaged product may take place. Our vapour barrier laminate range protects against moisture ingress, eliminating the risk of product. The aim is to give an in-depth and up-to-date view of available solutions, reflecting the latest innovations in the sector. This particular combination gives the tinplate an interesting set of properties: strength and stiffness, formability, weld-ing ability, lacquer ability and printability, good cosmeti appearance and corrosion resistance. Genuine Autobag® bags-on-a-roll and SidePouch® bags-in-a-box are system-matched and guaranteed to run on all.
