

PIENAAR ENERGY (PTY) LTD

Current status of photovoltaic micro-inverters

Overview

The solar microinverter market is valued at USD 5 billion in 2025 and is projected to reach USD 26.77 billion by 2035, expanding at a CAGR of 18%. Performance Trade-off: While microinverters add \$1,500-\$3,000 to a typical residential solar system, they can increase energy production by 5-25% in shaded or complex roof conditions, often justifying the premium through enhanced long-term performance and 25-year warranties. The market is experiencing steady growth, driven by the rising adoption of rooftop solar systems and the increasing emphasis on. The solar photovoltaic (PV) market has grown exceptionally in recent years. As per the International Energy Agency (IEA), new solar capacity added between now and 2030 will account for 80% of the growth in renewable power globally.
