

**PIENAAR ENERGY (PTY) LTD**

# **Damascus battery energy storage station construction costs**

## Overview

---

Here are some key cost estimates: \$280 - \$580 per kWh for installed costs, with larger systems potentially costing \$180 - \$300 per kWh<sup>1</sup>. Costs can range from \$300 to \$700 per kWh, influenced. In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an analysis of recent publications that include utility-scale storage costs. The suite of. As capacity increases, the cost per unit of energy storage typically decreases due to reduced equipment and construction costs per kilowatt-hour. The Damascus prototype provides valuable insights into: "We're not just digging holes - we're engineering the foundation for 24/7 clean energy," says project director Omar.
