

**PIENAAR ENERGY (PTY) LTD**

# **Development prospects of three-phase inverter**

## Overview

---

The global three-phase PV inverter market, valued at \$4.611 billion in 2025, is projected to experience robust growth, driven by the increasing adoption of solar power across industrial and commercial sectors, as well as large-scale ground-mounted PV power stations. Three-phase PV Inverter by Application (Industrial and Commercial, Ground PV Power Station), by Types (5-15kW, 15-25kW, 30-40kW, 40-70kW, 70-200kW, Above 200kW), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America), by Europe (United Kingdom). The three phase inverter market is projected to grow from USD 3.2 billion by 2035, at a CAGR of 7.6% market share, while low power (up to 10 kw) will lead the power rating segment with a 47%. The rising awareness of climate change and the need for sustainable energy sources have significantly boosted the demand for renewable energy systems.
