

PIENAAR ENERGY (PTY) LTD

District Energy Storage System Factory

District Energy Storage System Factory

How it Works

District energy systems produce hot water, steam, or chilled water at a central plant or satellite plants and then distribute the energy through a network of underground pipes to connected buildings.

Lithium Battery**

6000+ Cycle Life

District Energy Systems Overview

A district energy distribution system serves as a type of energy storage, with steam, hot water, or chilled water circulating in the system, effectively smoothing the load for the central plant.

What is District Energy? See how it works and how it can help us

District Energy Systems are networks of hot and cold-water pipes, typically buried underground, that are used to efficiently heat and cool buildings using less energy than if the individual buildings were to ...
