

**PIENAAR ENERGY (PTY) LTD**

# **Do Indonesian solar panels make money**

## Overview

---

- Financial Performance: Well-designed 100-150 kWp commercial systems achieve simple payback periods of 6-9 years, IRR of 12-18%, and NPV exceeding IDR 500-800 million over 25-year lifespans with proper system sizing and consumption matching.
- Financial Performance: Well-designed 100-150 kWp commercial systems achieve simple payback periods of 6-9 years, IRR of 12-18%, and NPV exceeding IDR 500-800 million over 25-year lifespans with proper system sizing and consumption matching.
- Dramatic Cost Reduction: Solar PV module prices declined 93% from USD 1.13/Wp (2024), with total installed commercial rooftop system costs reaching IDR 12-18 million/kWp making solar economically competitive with grid electricity
- Financial Performance: Well-designed. Discover comprehensive insights into the statistics, market trends, and growth potential surrounding the solar panel manufacturing industry in Indonesia. There is an average of 2975 hours of sunlight per year (of a possible 4383) with an average of 8 hours 08 minutes of sunlight per day. 1 The. The Indonesia Solar Energy Market Report is Segmented by Technology (Solar Photovoltaic and Concentrated Solar Power), Grid Type (On-Grid and Off-Grid), and End-User (Utility-Scale, Commercial and Industrial, and Residential). The Market Sizes and Forecasts are Provided in Terms of Installed. Solar energy is gaining significant attention and adoption in Indonesia as the country looks to diversify its energy sources and reduce dependence on fossil fuels. The market is moving towards Highly concentrated. The range lies from 0 to.
