

PIENAAR ENERGY (PTY) LTD

Do you need to use glue when installing photovoltaic panels

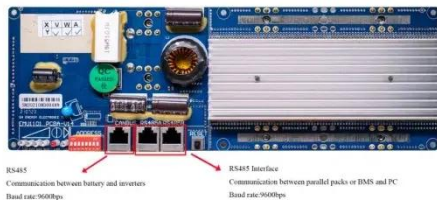

Overview

Using regular glue for solar panel installation is not advisable. Common adhesives may not possess the necessary strength, flexibility, or weather resistance required for long-term performance. When it comes to installing solar panels, selecting the appropriate adhesive is crucial for ensuring durability and functionality. The answer?

It's stickier than melted caramel on a summer day. While traditional solar installations typically use mechanical fasteners, modern solutions increasingly incorporate specialized. Can I always use glue?

At Sun-Age we are specialized in fixing photovoltaic panels without drilling; at the same time it should be noted that it depends on the roofing: you can glue in the presence of a concrete slab, brick, stoneware, slated sheathing. It is important to follow the correct. How to apply glue between photovoltaic to avoid using any adhesive for solar panels. You will probably need to replace them every couple of years.

Do you need to use glue when installing photovoltaic panels

Frequently asked questions about fixing photovoltaic panels on roofs

Can I always use glue? At Sun-Age we are specialized in fixing photovoltaic panels without drilling; at the same time it should be noted that it depends on the roofing: you can glue in the presence of a ...
