

**PIENAAR ENERGY (PTY) LTD**

# **Does solar power generation pollute groundwater**

## Overview

---

Solar power facilities do not affect groundwater. Using solar energy can have a positive, indirect effect on the environment when solar energy replaces or reduces the use of other energy sources that have larger effects on the environment. This section addresses baseline environmental assessment prior to construction, stormwater management, leaching of metals from panels, stray voltage concerns, radiation and electromagnetic fields, impacts to wildlife, and disposal or recycling of panels at the end of their useful life. Grid-scale. However, according to the Union of Concerned Scientists, while solar uses less water, the chemicals used in the manufacturing process are caustic and toxic. In September 2018, sediment from the construction of a nearby solar farm, AL Solar, flowed into Chattahoochee River in Alabama. Solar panels are impervious to water, raising concerns they could increase stormwater runoff similarly to concrete or.

## Does solar power generation pollute groundwater

### Do the solar power facilities contaminate groundwater and the

Solar power facilities do not affect groundwater. Soil modifications are minimal, and high-quality stainless steel is used as a construction material. Transformers are banded to minimize ...

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW/115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## How do solar farms affect water resources and soil health

There is a potential risk of contamination from spills and chemicals used on or near solar farms, such as dust suppressants, which could pollute ground or surface waters if not properly ...
