Does the UK have a high share of solar power generation

Overview

Solar power has a growing role in electricity production in the United Kingdom, contributing around 6.4% of the UK's annual power generation in 2025. [3] Solar generation reached an all-time high of. Renewables accounted for majority of annual UK electricity generation for the first time in 2024, with solar enjoying record highs despite fewer sun hours Gains for PV reflect increased deployed capacity, which hit 18 GW in February 2025 according to the latest government figures. The UK also just had its sunniest spring since record keeping began in 1910, the Met Office. Solar energy accounted for some 5.8 percent share a year earlier. 2 gigawatts of solar PV installed as of end of 2023. Get notified via email when this statistic is updated.

Does the UK have a high share of solar power generation

A record year for British solar

So far, 2025 is the UK's strongest year for solar on record. Solar power in Great Britain had a record-breaking start to 2025, with solar up 32%, to produce a record 9.91 TWh, breaking ...
