Double-width polysilicon solar glass

Overview

Frameless solar module also known as Double Glass Solar Panel is an innovative product uses solar cells layer laminated between two 2.0mm heat-strengthened glasses instead of the traditional polymer back-sheet. It affects: Here are. By encapsulating solar cells between two layers of glass, these modules offer unparalleled durability and efficiency. This helps them make 5% to 30% more energy than regular panels. Pick places with bright surfaces like white gravel for installation. The new double-sided n-type Silk® Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from 620 to 630 Watts, completes the FuturaSun model range.

Double-width polysilicon solar glass

What are the advantages of dual-glass Dualsun modules?

Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the front and on the rear with a thickness of 2.0 mm each.
