Dushanbe electricity consumption

Overview

Currently, monthly electricity consumption in Dushanbe is estimated at 150 million somoni, which is 25% of the national average. 9%, which is significantly lower than last year's figure of 21. This was reported at a meeting of the working group on the results of the work of the capital branch of OJSC "Electric Grid Distribution. The project installed 215,835 electricity meters and 144,000 gas meters, as planned. The meters are generally in good working order, though the gas meters have been unused since the end of 2012, after the discontinuation of gas imports from Uzbekistan (Tajikistan's main source of gas). 2 The high reliance on hydropower generation results power surplus in summ onsumption of electricity has declined by. This paper examines energy consumption patterns in multi-apartment residential buildings in Dushanbe, Tajikistan, highlighting the inefficiencies in the existing heating infrastructure influenced by historical construction practices and economic conditions. Deputy Prosecutor General of Tajikistan Sarvar Azimzoda. The United Nations reports a global shift toward renewable energy, calling it a "positive tipping point.
