

## **PIENAAR ENERGY (PTY) LTD**

# **EPC general contracting for server racks in remote areas**

## Overview

---

This comprehensive guide profiles 30 leading contractors, EPCs (Engineering, Procurement, and Construction), and specialized firms that are shaping the digital infrastructure landscape across India and APAC. Every industry player is looking to scale up services, but leadership in the market will be defined by one crucial factor: who can scale up the fastest and most reliably?

With deep roots in industrial construction, Gray is ideally positioned to deliver your next data center or mission critical. Many businesses are now either building or expanding designated data centers to improve their information infrastructure. These spaces have gradually become essential parts of a business or even the core of the business. The design and layout of these spaces are still poorly understood by many. The Asia-Pacific region is experiencing an unprecedented data center construction boom, driven by hyperscale cloud deployments, enterprise digital transformation, and the growing demand for AI-ready infrastructure. EPC is also highly applicable to distinct project types, such as complex industrial and manufacturing facilities. We offer the most flexible cabinet and rack solutions designed to meet the needs of the most demanding environments. With the most frame styles.
