

**PIENAAR ENERGY (PTY) LTD**

# **Ecuadorian school uses 10kW photovoltaic energy storage container**

## Overview

---

In this case study, we explore how one Ecuadorian family transitioned to clean, reliable solar power using a system that includes a 4.72 kWp solar panel array, a DEYE 8kW hybrid inverter, and a 10kWh lithium battery provided by MOTOMA — a global leader in new energy technology. UNICEF Ecuador's comprehensive approach focuses specifically on addressing inequities in education and early childhood development, water, sanitation, and hygiene (WASH), as well as climate resilience. With 42% of Ecuador's electricity now coming from renewable sources (National Electricity Operator data). Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and increase energy efficiency.
