

**PIENAAR ENERGY (PTY) LTD**

# **Energy Storage New Energy Market Trends**

## Overview

---

After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026. Key markets are expanding, emerging regions are stepping into the spotlight, and battery storage is increasingly replacing gas generation. This article was written by Nelson Nsitem, Senior Associate, Energy Storage, and Yayoi Sekine, Head of Energy Storage, BloombergNEF. It appeared first on the Bloomberg Terminal. Despite policy changes and uncertainty, installations passed 100 GW for the first time - a milestone achieved even as some of the largest energy markets grappled with significant policy shifts. 7% by 2034, nearly seven times its current value. The top trends in energy storage are: AI Integration - Falling battery pack prices. Energy storage provides real protection against power outages while allowing you to maximize the value of rooftop solar.
