# Energy Storage System Price Trends

## Overview

---

As of early 2026, the global average installed price for high quality off grid systems has stabilized between \$350 and \$550 per kilowatt hour. This report is available at no cost from NREL at [www.nrel.gov](http://www.nrel.gov). Cole, Wesley, Vignesh Ramasamy, and Merve Turan. Cost Projections for Utility-Scale Battery Storage: 2025 Update. Delivered quarterly, the US Energy Storage Monitor from the American Clean Power Association (ACP) and Wood Mackenzie Power & Renewables provides the clean power industry with exclusive insights through comprehensive research on energy storage markets, deployments, policies, regulations and. Energy storage system prices have fallen to their lowest level on record, dropping to a global average of \$117/kWh in 2025. The new figures come from BloombergNEF's Energy Storage System Cost Survey 2025, which reports a 31% decrease compared with 2024. BNEF says the decline is driven by continued. As the global community increasingly transitions toward renewable energy sources, understanding the dynamics of energy storage costs has become imperative. This guide breaks down residential, commercial, and utility-scale ESS costs, analyzes key price drivers, and reveals how new technologies are reshaping energy storage economics. As a result, developers and utilities are scaling deployments across residential.

## Energy Storage System Price Trends

---

### Cost Projections for Utility-Scale Battery Storage: 2025 Update

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...
