

PIENAAR ENERGY (PTY) LTD

Energy storage for renewable energy cape verde

Overview

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage. Africa Finance Corporation (AFC) and public-private-partnership (PPP) Cabeolica have inaugurated 13. Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica. The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's electricity production. During the presentation of the project, Cape Verde's National Director for Industry, Trade and Energy, Rito Évora, announced that the energy storage centre is scheduled to be operational by 2030, with the aim of injecting 7% of renewable energy into the national public grid and 18% into that of the. The initiative will generate over 60 GWh per year, reduce 50,000 tons of CO₂ emissions, and help Cape Verde reach 50% renewable electricity by 2030.
