

PIENAAR ENERGY (PTY) LTD

Energy storage system export certification to Japan

Overview

In Japan, energy storage batteries are not yet subject to mandatory PSE certification under the Electrical Appliance and Material Safety Law. Compliance with. As global IoT security governance enters a new phase, the JC-STAR Certification (Japan Cyber Security Technical Requirements for Secure IoT Devices Conformity Assessment and Labeling Scheme), officially implemented by Japan in 2025, has become a key security access standard for smart hardware. This guide provides an overview of necessary certifications for exporting energy storage batteries. 3 is a United Nations safety standard for the transportation of lithium batteries. Before shipping, lithium batteries must pass tests such as: - Altitude simulation -. Diving into the world of import/export certifications for energy storage systems can feel like a daunting task, but it really is vital for businesses that want to make the most of C&I (commercial and industrial) energy storage solutions.

Energy storage system export certification to Japan

System Topology

Required Certifications for Energy Storage Battery Export

The energy storage market is booming globally, and certifications are a key concern for industry professionals. This guide provides an overview of necessary certifications for exporting energy storage batteries.
