

PIENAAR ENERGY (PTY) LTD

Environmental sustainability norway

**Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

Overview

Though the country performs well in global rankings for achieving the sustainable development goals, key challenges remain, mainly related to unsustainable consumption and production patterns, greenhouse gas emissions and, in particular for biodiversity, land use. The Norway country profile provides a concise overview of key trends across three dimensions: environment and climate; socio-economic change; and system change (energy, mobility and food) in the country. We are working for a clean and rich environment. Our primary tasks: reduce greenhouse gas emissions, manage Norwegian nature, and prevent pollution . Norway falls into the sample's top group (rank 2) in the area of environmental sustainability. The act requires the government to update parliament. Norway; a mid-sized, cold climate, European country (with a lot of fjords). It's also a global leader in sustainability. Sustainability is built into Norwegian culture. 26. Learn about the market conditions, opportunities, regulations, and business conditions in Norway, prepared by U.S. Embassies worldwide by Commerce Department, State Department and other U.S.
