Ethiopia hospital uses 10MW off-grid solar-powered container

Overview

Mudula Primary Hospital, a rural medical lifeline for over 600,000 people in the Tembaro Special Woreda and neighboring districts of Central Ethiopia Region, is now officially running on solar power. After months of design, coordination, and on-the-ground implementation by the local team from Solar. The project is a demonstration project funded by the United Nations and tendered jointly by the United Nations Ethiopia Agency and the Ministry of Health in 2017. The. More than 300 remote health care facilities across Ethiopia will be powered with solar energy, benefiting an estimated 6. 7 million citizens across. Ethiopia is embracing solar power as a solution to improve healthcare access, particularly in remote and rural areas where electricity supply is often unreliable.
