

PIENAAR ENERGY (PTY) LTD

Explosion-proof solar panels on-site energy

Battery String-S224

- 1C Charge/Discharge
- Easy configuration and maintenance
- Power supply can be single battery string or parallel battery strings

Overview

ATEX and IECEx solar panels are photovoltaic panels certified for use in areas where explosive atmospheres may be present. Explosive atmospheres—those that contain flammable gases, vapours, or mist—are particularly dangerous, and it is in these conditions that ATEX and IECEx -certified solar panels are designed to thrive. Orga's explosion proof solar panels forms a part of a complete stand alone solar system that also comprises a battery unit, battery charger or rectifier unit and a distribution system. Designed to endure harsh and. Explosion-Proof LED Lamp: IP66/IK09 aluminum lamp fixture that is anti-corrosion and explosion-proof, equipped with high-efficiency 3030 LED chips delivering 170lm/w and a lifespan of over 100,000 hours. Case Study: Safely Powering Critical Pumps in Hazardous Locations with ATEX Solar. Ex solar PV systems are solar PV systems that are rated explosion-proof and are typically installed in hazardous or potentially explosive locations such as offshore O&G platforms or petrochemical refineries.

Explosion-proof solar panels on-site energy

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

Heavy-Duty Solar Panels Built to Last and Reduce ...

Our heavy-duty solar panels are designed to withstand both environmental and working hazards thus reducing repair and maintenance costs.
