

**PIENAAR ENERGY (PTY) LTD**

# **Fishing-light complementary photovoltaic energy storage**

## Overview

---

In order to save land, a fishing light complementary power generation concept is provided, fishing light complementary refers to the combination of fishery cultivation and photovoltaic power generation, a photovoltaic panel array is erected above the water surface of a. In order to save land, a fishing light complementary power generation concept is provided, fishing light complementary refers to the combination of fishery cultivation and photovoltaic power generation, a photovoltaic panel array is erected above the water surface of a. The invention relates to the technical field of fishing light complementary photovoltaic power generation, in particular to a fishing light complementary photovoltaic power generation system; the method comprises the following steps: a photovoltaic panel; the photovoltaic panel is used for. ing and light complementary photovoltaic power station?

Project Content: The fishing and light complementary photovoltaic power station uses the vast area of the fish pond to install solar panels on it to generate electricity. The photovoltaic modules a ic power plants affect meteorology and. Explore the Fishing Solar Complementary Photovoltaic Power Station, a sustainable energy solution that combines solar energy with fishing activities. The photovoltaic mod of PV in land is significantly different from those in lake. Fish and shrimp can be cultivated in the water below the photovoltaic panels.

## Fishing-light complementary photovoltaic energy storage

---

### Design and Analysis of Fishery-Photovoltaic Complementary Projects

In response to the national "carbon peaking and carbon neutrality goals" strategy, to achieve clean energy transformation and reduce carbon emissions, the con

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1000V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Optimizing
- Max. PV Input Current 15A, Compatible with High Power Modules

 Intelligent Simple O&M

- IP65 Protection Degree, support outdoor installation
- Smart VI Curve (ingress) Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD, prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Fishing-light complementary photovoltaic energy storage

When you're looking for the latest and most efficient Fishing-light complementary photovoltaic energy storage for your PV project, our website offers a comprehensive selection of cutting-edge products ...
