# Fixed photovoltaic bracket processing technology

**Higer conversion efficiency**

CAN/RS485/WIFI/4G  
Blue tooth communication

20 Kwh

30 Kwh

50 Kwh

Thick shell, well protection for inside cells

BMS customization supported

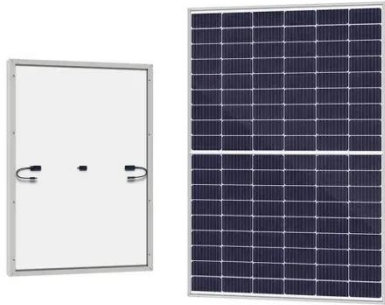

## Overview

---

The fixed bracket technology mainly includes: mechanical design, mechanical processing and outsourcing galvanizing. Fixed photovoltaic brackets are supports that allow photovoltaic arrays to receive solar radiation at a fixed angle. Moreover, the different materials, assembly methods, bracket installation angles, wind loads and. A PV bracket is a support structure that arranges and fixes the spacing of PV modules in a certain orientation and angle according to the specific geographic location, climate, and solar resource conditions of the PV power generation system construction. As an important part of the PV power. ic roof brackets and 1200MW photovoltaic ground brackets. Comprising a 3-in-1 Decoiler Straightener Feeder, a Stamping Press, and a Cold Roll Forming Machine, this line adopts a “Pre-Punching.

## Fixed photovoltaic bracket processing technology

---

### Photovoltaic bracket material processing technology

A Tracking Photovoltaic (PV) Bracket, also known as a solar tracker, is a dynamic mounting system designed to optimize the orientation of photovoltaic panels towards the sun throughout the day.

## Classification And Design Of Fixed Photovoltaic Mounts

PV brackets can be divided into three types: fixed, tilt-adjustable, and auto-tracking type, and its connection method generally has two forms of welding and assembly. Among them, fixed ...
