

**PIENAAR ENERGY (PTY) LTD**

# **Flywheel Energy Storage in Tanzania**

## Overview

---

Flywheel energy storage (FES) works by spinning a rotor ( ) and maintaining the energy in the system as . When energy is extracted from the system, the flywheel's rotational speed is reduced as a consequence of the principle of ; adding energy to the system correspondingly results in an increase in the speed of the flywheel. While some systems use low mass/high spee.

### Tanzania Energy Storage Flywheel

In this section, we will look closely at the comparative analysis of flywheel energy storage systems (FESS) alongside alternative storage solutions, particularly battery storage and pumped hydro storage.

Flywheel energy storage (FES) works by spinning a rotor (flywheel) and maintaining the energy in the system as rotational energy. When energy is extracted from the system, the flywheel's rotational speed is reduced as a consequence of the principle of conservation of energy; adding energy to the system correspondingly results in an increase in the speed of the flywheel.

While some systems use low mass/high speed...
