

PIENAAR ENERGY (PTY) LTD

Foen wind power generation wind wall

Overview

In its current iteration, the wall is made up of 25 off-the-shelf wind turbine generators (the middle part the blades spin around). These are attached to 25 vertical rods with square panels attached alongside them. Designed to be as aesthetically pleasing as possible. New York-based designer Joe Doucet has developed the Awind Fence, a visually appealing modular structure composed of vertical wind turbines. This unique design is poised to enhance the adoption of wind energy in urban settings such as hotels, corporate buildings, and residential units. Image of the Wind Fence developed by Airiva. The fence consists of vertical wind turbines, is. Designer Joe Doucet presents an innovation that aims to create a modern system for capturing renewable free energy. The wind power wall provides a modern and effective system generating 10 kilowatts of clean power for residential use.

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW/115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

Super impressive wall of wind turbines yield 2,200 kWh of quiet energy

The fence consists of vertical wind turbines, is modular, and, most importantly, is pleasing to the eye, making it more likely to be adopted in hotels, corporate buildings, and residential
